Manufacturing

FDA Approved GMP-Certified Production

Our facility is **FDA-registered**, meaning we comply with strict regulatory guidelines to ensure the safety, quality, and integrity of every gummy produced. We follow all FDA requirements for ingredient sourcing, labeling, and manufacturing to bring you a fully compliant product.

We are a **GMP-certified** facility, adhering to **Good Manufacturing Practices** to guarantee consistency, purity, and safety in every batch. Our rigorous quality control processes ensure that each gummy meets the highest industry standards from formulation to packaging.

Our Packaging

-- Pack up the goodies
and you are ready to go!

CLEAR PET PLASTIC ROUND PACKER BOTTLE

400 CC 53-400 Neck 60/90 x 3g gummies

• 45mm/53mm

STAND-UP POUCH WITH RESEALABLE CLOSURE

- Various sizes
- Easy to carry package

Contact us for more packaging and shipping/display container options for your targeted customers and markets.

R & D

CORE CAPABILITIES

- **3g Gummy Format** – Standard size that provides ample capacity for complex formulations without compromising taste or texture.
- **High Active Load** – Proven success with 10:1 gummies, delivering up to **300 mg of active ingredients per gummy** while maintaining structural integrity and consumer appeal.
- **Broad Ingredient Experience** – From nutraceuticals and botanical extracts to functional food additives, our team works with vitamins, minerals, proteins, plant extracts, and specialty compounds.
- **Base Options** – Pectin-only (vegan-friendly) or pectin-based hybrid systems tailored to your brand's market positioning.
- **Flavor Masking & Palatability** – Expertise in overcoming bitterness, sourness, or off-notes associated with high active loads, ensuring consumer-friendly taste profiles.

-- Custom Formulation Development for High-Impact Gummies

At GummyMaker, we specialize in transforming innovative ideas into market-ready gummy products. Our R&D process is built for precision, speed, and scalability – helping brands create unique, compliant, and commercially viable formulations.

DEVELOPMENT PROCESS

- 1 Scope Alignment**
We define project objectives, active ingredient targets, and compliance needs up front.
- 2 Formulation Trials**
Rapid bench-top prototyping to evaluate texture, flavor, and active stability.
- 3 Pilot Runs**
Small-batch production to validate scalability and shelf stability.
- 4 Documentation & Compliance**
Complete SOPs, COAs, and regulatory support for US and international markets.

Why Brands Choose GummyMaker?

- **Speed to Market** – Streamlined R&D cycles to minimize time from concept to shelf.
- **Complex Problem Solving** – Success with challenging formulations (e.g., high acid loads, volatile actives, multi-active blends).
- **End-to-End Capabilities** – Manufacturing, packaging, labeling, and fulfillment under one roof for full control over quality and timelines.
- **Custom & White-Label Options** – Flexible engagement models for both proprietary formulas and ready-to-go catalog SKUs.
